

Step 1

Find the **Settings** icon on your iPhone and touch it.

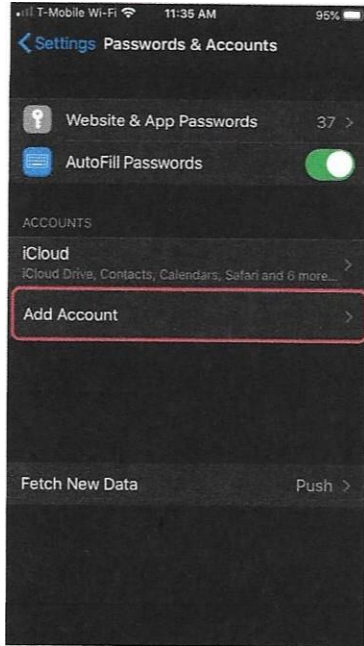

Step 2

Touch the **Passwords & Accounts** menu.

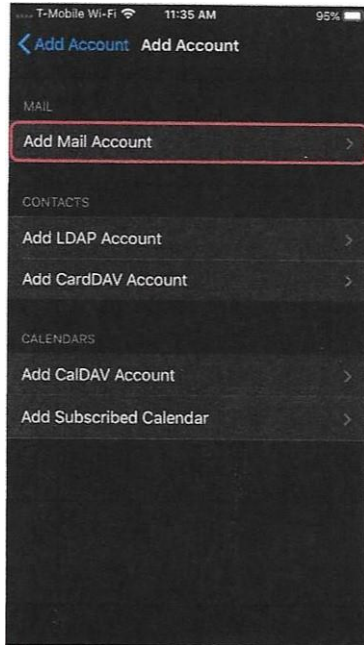

Step 3 Go to the **Add Account** menu

Step 4 Touch **"Other"**.

Step 5 Touch the Add Mail Account menu.

Step 6 Enter your "Name", "Email", "Password" and the "Description" of what you want this account named. Then touch Next.

Step 7

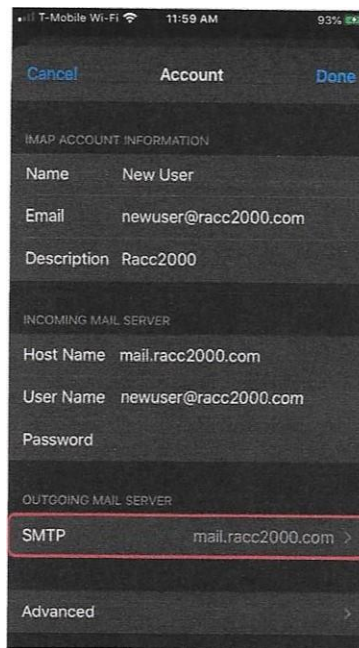

For the **INCOMING MAIL SERVER** use the below settings:
Host Name: **mail.racc2000.com**
User Name: **Your email address**
Password: **Your email password**
For the **OUTGOING MAIL SERVER** use the below settings:
Host Name: **mail.racc2000.com**
User Name: **Your email address**
Password: **Your email password**

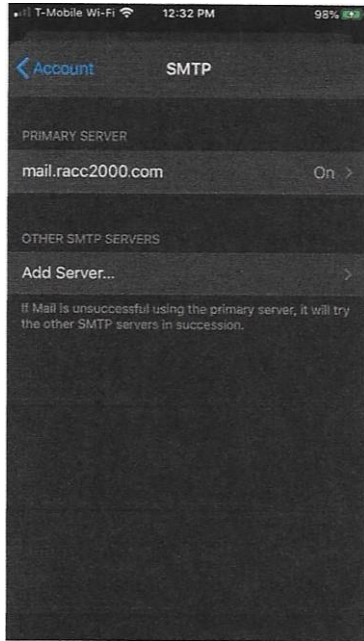

Step 8 You will have a pop-up message stating "Cannot Connect Using SSL". Touch **Yes** to continue without using SSL

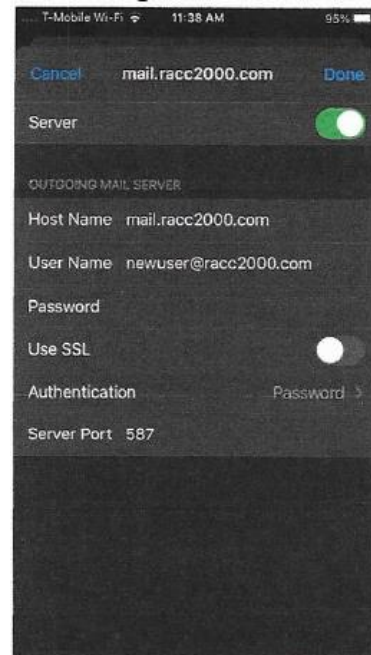

Step 9 Verify the **OUTGOING MAIL SERVER** settings by touching **SMTP mail.racc2000.com**

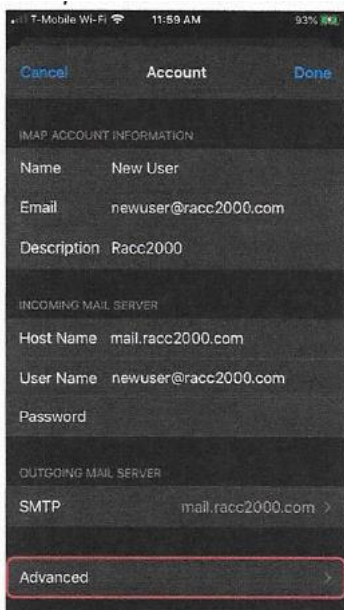

Step 10 Then touch **mail.racc2000.com**

Step 11 The settings should look like the image below.

Step 12 Verify the INCOMING MAIL SERVER settings by touching **Advanced**.

Step 13 Scroll down to INCOMING SETTINGS and they should look like the image below
